Winneshiek County Sanitarian Resolution No. 25-26 for the Destruction or Control of Noxious Weeds

RESOLUTION NO. 25-26 for the Destruction or Control of NOXIOUS WEEDS BE IT RESOLVED, by the Board of Supervisors of Winneshiek County, Iowa That pursuant to the provisions of Chapter 317 of the 2021 Code of Iowa, it is hereby ordered: 1. That each owner and each person in the possession or control of any lands in Winneshiek County shall properly spray, cut, burn, or otherwise destroy or control all noxious weeds thereon, as defined in this chapter, at such time in each year and in such manner as shall prevent said weeds from blooming or coming to maturity, and shall keep said lands free from such growth of any other weeds as shall render the streets or highways adjoining said land unsafe for public travel. Noxious weeds shall be cut or otherwise destroyed or controlled on or before the following dates and as often thereafter as it is necessary to prevent seed production: PRIMARY NOXIOUS WEEDS: June 15, 2025 for musk thistle, quack grass, perennial sow thistle, Canada thistle, bull thistle, field bindweed, horse nettle, leafy spurge, wild parsnip, Japanese Knotweed, perennial pepper-grass, Russian knapweed and buckthorn. SECONDARY NOXIOUS WEEDS June 15, 2025 for butterprint, cocklebur, wild mustard, wild carrot, buckhorn, sheep sorrel, sour dock, smooth dock, poison hemlock, multiflora rose, wild sunflower, puncture vine, teasle and shattercane. 2. That each owner and each person in the possession or control of land in Winneshiek County infested with any noxious weeds including

perennial sow thistle, bull thistle, field bindweed, horse nettle, quack grass, leafy spurge, perennial pepper-grass, Russian knapweed, poison hemlock, wild sunflower and teasel, shall adopt a program of weed destruction, described by the Weed Commissioner which in five years may be expected to destroy and will immediately keep under control such infestations of said noxious weeds. 3. That if the owners or persons in possession or control of any land in Winneshiek County fail to comply with the foregoing orders, the Weed Commissioner shall cause this to be done and the expense of said work, including cost of serving notice and other costs, if any, be assessed against the land and the owners there of. 4. Quack grass, where acting as soil binder, may be eliminated from the above regulation, per section 317.13. 5. The multiflora rose won't be considered a noxious weed when cultivated for use understock for cultivated roses or as ornamental shrubs in gardens, per section 317.1(2). 6. That the County Auditor be and is hereby directed to cause notice of the making and entering of the foregoing order by one publication in each of the official newspapers of the county. Sodium (ppm)	N/A (N/A)	SGL	4	06/07/2022	No	Erosion of natural deposits; Added to water during treatment process

Note: Contaminants with dates indicate results from the most recent testing done in accordance with regulations.
DEFINITIONS
 • Maximum Contaminant Level (MCL) – The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
 • Maximum Contaminant Level Goal (MCLG) -- The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
 • ppb -- parts per billion.
 • ppm -- parts per million.
 • pCi/L – picocuries per liter
 • N/A – Not applicable
 • ND -- Not detected
 • RAA – Running Annual Average
 • Treatment Technique (TT) – A required process intended to reduce the level of a contaminant in drinking water.
 • Action Level (AL) – The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.
 • Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
 • Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
 • SGL – Single Sample Result
 • RTCR – Revised Total Coliform Rule
 • NTU – Nephelometric Turbidity Units
GENERAL INFORMATION
 Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water posed a health risk. More information about contaminants or potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).
 Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).
 If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. OSSIAN WATER SUPPLY is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.
SOURCE WATER ASSESSMENT INFORMATION
 This water supply obtains its water from the sandstone and dolomite of the Cambrian-Ordovician aquifer. The Cambrian-Ordovician aquifer was determined to have low susceptibility to contamination because the characteristics of the aquifer and overlying materials provide natural protection from contaminants at the land surface. The Cambrian-Ordovician well will have low susceptibility to surface contaminants such as leaking underground storage tanks, contaminant spills, and excess fertilizer application. A detailed evaluation of your source water was completed by the Iowa Department of Natural Resources and is available from the Water Operator at 563-380-0935.
CONTACT INFORMATION
 For questions regarding this information or how you can get involved in decisions regarding the water system, please contact OSSIAN WATER SUPPLY at 563-380-0935
 Decisions are made at the city council meetings on the 1st Monday of each month at 5:00 pm at City Hall and are open to the public.
 The Consumer Confidence Report for the City of Ossian's water system is not being mailed to our customers, it is being published. If you would like a copy of the report, it is available at the city clerk's office and on our web site: www.ossianiowa.com.
 For questions regarding this information or how you can get involved in decisions regarding the water system, please contact the Ossian City Clerk at 563-532-8939.
